

Arbortext Software Compatibility Matrices

17-Aug-2016

Introduction

The matrices presented here represent the combinations of platforms, operating systems, and third-party products supported by PTC's Arbortext products. These product combinations are based on compatibility, testing, performance and reliability. Other software combinations not shown here may perform properly but are not qualified through PTC's testing and validation process, and are not supported through our technical support group.

Definitions

- Products identified as "bundled" are included with the Arbortext Product that you purchased. Products that are not bundled are either separately priced products, optional add-on products, or products that you would acquire from a company other than PTC.
- Products identified as "dependent" are software products that require other Arbortext products to be purchased.

For information on when Arbortext maintenance releases will be available, see the PTC product calendar at this URL:

http://www.ptc.com/cs/product_calendar/PTC_Product_Calendar.htm.

For the latest comprehensive information regarding compatible PTC graphics tools with the SLM products, please see the SLM Graphics Compendium:
