

# B&W SmartAnalysis 5.0

One GUI for all types of measurement

New Model Outline determination

History Tree for all types of analysis

Additional information on selected refs

Developed together with experienced users

**B&W SmartAnalysis** does provide easy access to most measurement functions used by designers. The type of measurement is predefined by the selected references and is listed in a history tree for later use.

**B&W SmartAnalysis** offers the following functions:

- Carry out all required analysis of Pro/ENGINEER models in one GUI
- Do many measurements in one loop.
- Redisplay old analysis results in a history tree
- Access all geometry and some model analysis functions in the same GUI, no matter which Pro/ENGINEER release you're working with
- Get 100% accurate solid outline of the solid models and store the result in part-parameters.

**Supported Platforms:** Windows NT, 2000, XP, XP64, Vista

**Supported Pro/ENGINEER Versions:** Wildfire 2, Wildfire 3 and Wildfire 4

**License types:**

**Extension:** Shut down Pro/ENGINEER to release the license
