**B&W SmartMenu** enable the user to select functions of the Pro/ENGINEER menu and open a certain dashbord without preselcting any references. Its also possible to add your own commands to the right mouse button menus.

## B&W SmartMenu allows the user to

- access 'Edit'-features permanently, even without a valid selection
- find the functions in a workflow oriented structure
- use RMB popup menus in different modes (Part, Assembly, Drawing)

## B&W SmartMenu allows the system administrators to

- create own RMB Popup menus, pull-down menus and submenus
- distribute Smart Menu independent from user specific config.win-files
- configure Smart Menu within a comfortable graphical user interface
- add a one- line help for every configured menu
- create menus in two languages parallel (i.e German, English)

Supported Platforms: Windows NT, 2000, XP, XP64, Vista

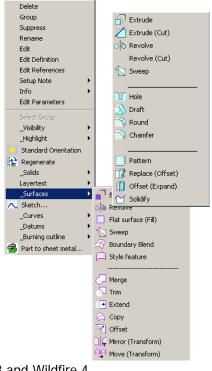

Supported Pro/ENGINEER Versions: Pro/ENGINEER Wildifre 2, Wildfire 3 and Wildfire 4 Available as Extension: Shut down Pro/ENIGNEER to release the license

No preselection required to use any Edit function

Easy use of Wildfire for former 2001 customers

Customize all menus for different modes

Support of many different design modes (such as Piping, Cabling, NC)
