

Concept Design

Learn about the latest trends
in concept design

Respondent's role in concept design:

47%

The creator

30%

The influencer

6%

The executive

5%

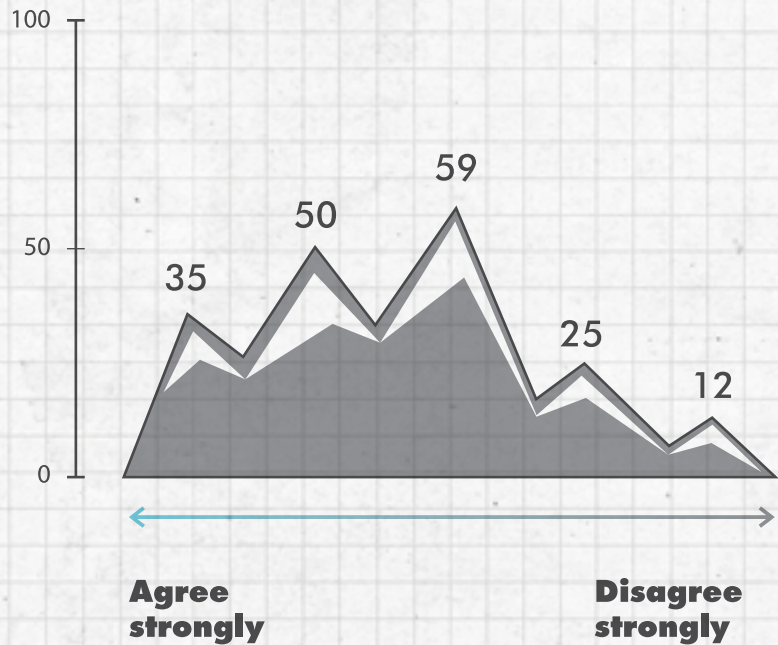

The manager

Describe your concept design process:

**Our process is
industry
leading**

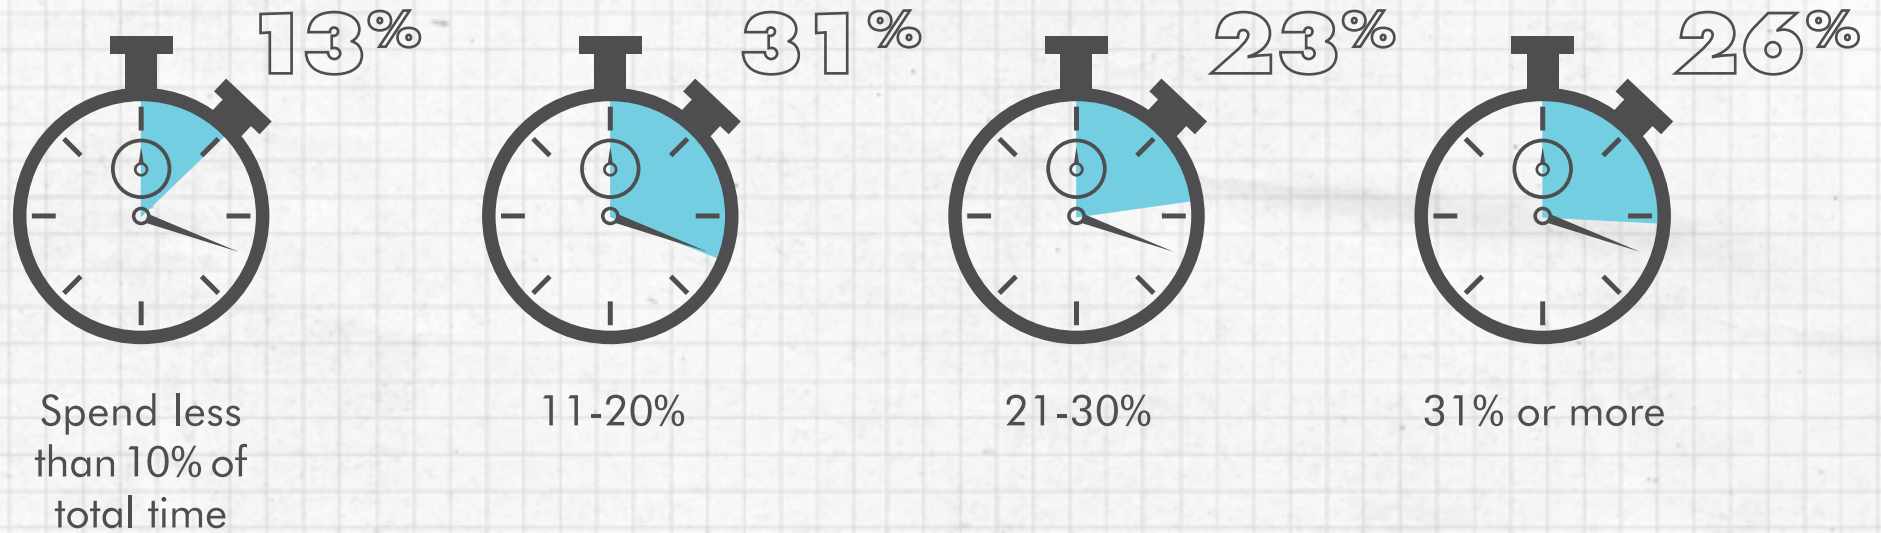

**Our process leads
to innovative
products**

Costs and Concept Design

The average percent of time spent on concept design when compared to the total time required to design, develop, and manufacture a product:

By the time the concept design is complete, the fixed percent of total product cost is:

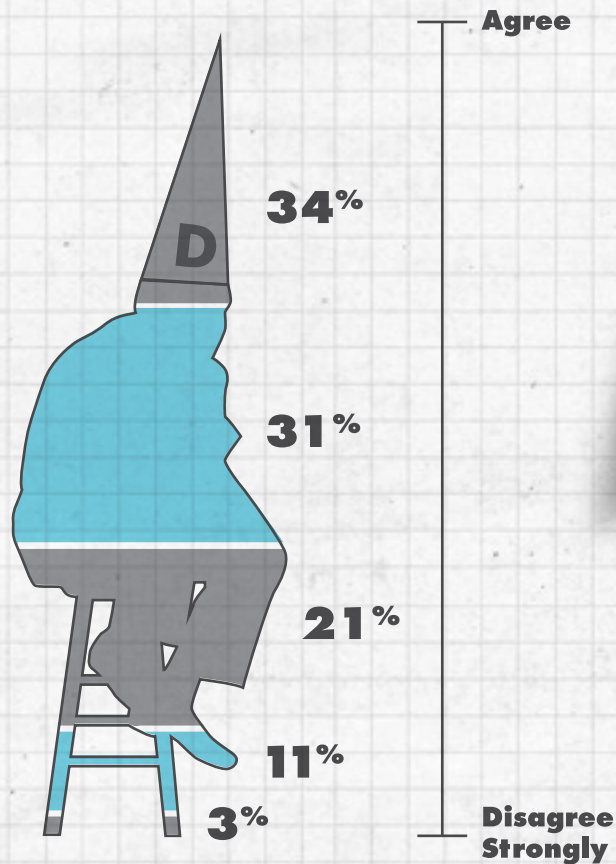

Average number of design alternatives explored during the concept design stage when developing new products:

Source: *Trends in Concept Design*, PTC study, July 2011 - <http://www.ptc.com/go/concept-design>

**"If you don't
start with a
good concept,
your product
FAILS**

...and that leads to lost market share, dissatisfied customers, squandered resources, and wasted time."

“To be successful you need innovation in new products, and that requires good concept design.”

Source: Trends in Concept Design, PTC study, July 2011 - <http://www.ptc.com/go/concept-design>

"The concept design process is often cut short due to schedule."

"Most critical decisions about the product are made during concept design."

Agree or Disagree

"We would benefit immensely by reducing the time spent on concept design."

56%

Agree

44%

Disagree

"We would benefit immensely by exploring more design alternatives during concept design."

92%

Agree

8%

Disagree

Tools and Processes in Concept Design

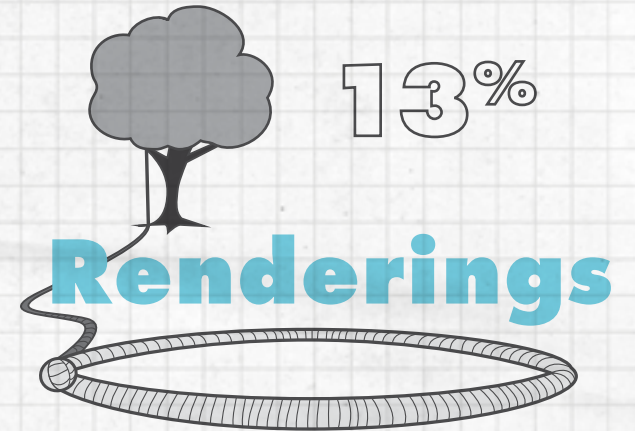

Within your company, concept designs and ideas are captured by:

 **Engineering notebooks**
13%

Hand-drawn sketches
21%

11%

34%

Paper vs. Electronic 51%

Types of software tools used during concept design:

Source: Trends in Concept Design, PTC study, July 2011 - <http://www.ptc.com/go/concept-design>

Number of design software applications used during concept design:

When multiple vendors provide the design software used for concept design development, extra work is required to recreate designs:

Percent of respondents who sometimes need to recreate design data during the concept design stage because their design tool formats are not compatible:

Grrrrrrrrrrrr!

Manner in which concept designs **typically evolve** in your company:

29%

**From
scratch**

45%

**By partially
leveraging
existing
designs**

23%

**By heavily
leveraging
existing
designs**

Managing Concept Design

Each person stores concept designs on a desktop

22%

We have centralized management of some concept designs (e.g., the ones we release to engineering)

37%

We strictly manage all concept designs, including all revisions, in a centralized, process-driven way

34%

Source: Trends in Concept Design, PTC study, July 2011
<http://www.ptc.com/go/concept-design>

Percent of respondents who agree or disagree with the following statement:

“ Concept design at my company is typically burdened with competing agendas: Product development teams, short on time, want only a few alternatives so they can thoroughly ensure that a concept meets requirements. On the other hand, limiting alternatives also limits exploration, insight, and innovation. ”

79%

Strongly agree

21%

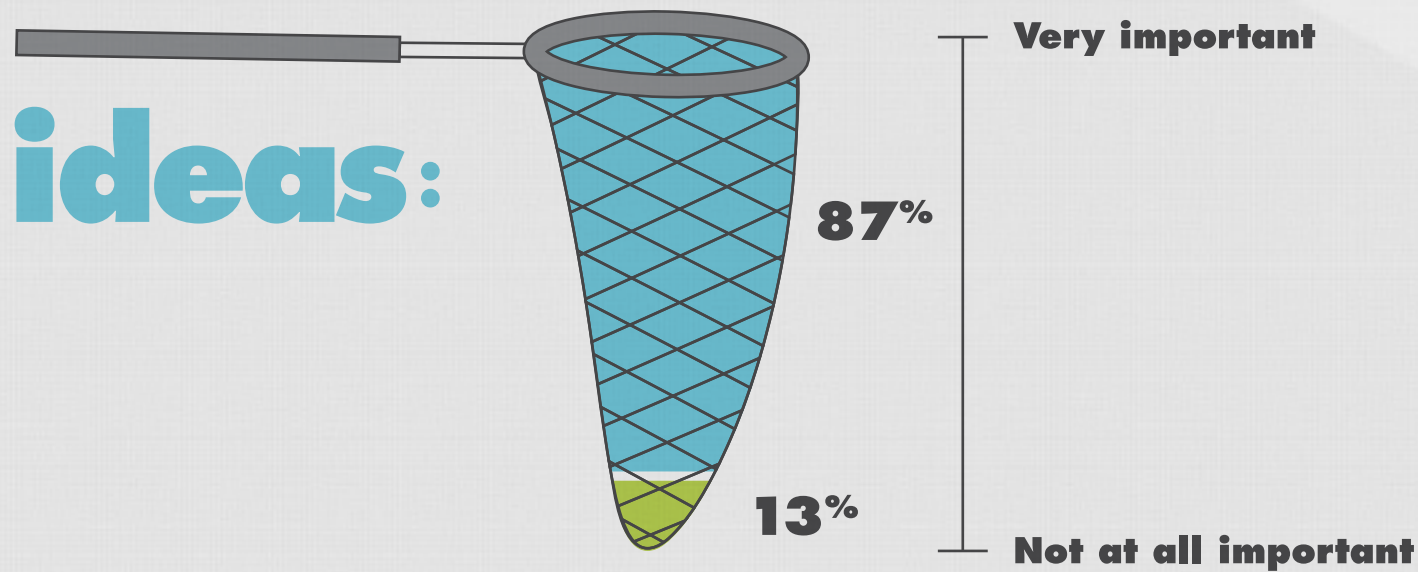

Strongly disagree

Engineering Notebooks

Percent of team members using engineering notebooks during concept design:

YES

66%

NO

23%

According to respondents, ownership of information in an engineering notebook belongs to:

60%

The company

19%

The individual

21%

Not sure

Adopting Multiple Tools for Concept Design

The policies and guidelines for your company's approach to software tools used during the concept design stage are:

18%

Very well managed. Everyone agrees on what recommended tools should be used at what stage.

29%

Mostly managed. We have a clear set of supported tools used by everyone in the organization but there is no universal agreement on what tools should be used when.

24%

Somewhat managed. We have mostly standard tools and some agreement on what tools to use when. There are some "rogue" tools.

15%

Mostly unmanaged. There are one to three recommended tools, but little agreement on what tools to use when. There are some "rogue" tools that duplicate capabilities.

14%

Not at all managed. It's a free-for-all. There is no clear set of recommended tools and no agreement on what tools to use when. Many tools duplicate capabilities.
