## Adding Export Functionality in the Project Plan Table

You can add **Export List to XLSX** and **Export List to PDF** actions to action models for these actions to be available on the Plan table in Windchill ProjectLink.

1. Make a backup copy of the `ProjectManagement-actionmodels.xml` file from `<Windchill>\codebase\config\actions`
2. Open the `ProjectManagement-actionmodels.xml` file from `<Windchill>\codebase\config\actions`
3. Add the actions to the end of the plan view toolbar actions section:

```
<model name="plan view toolbar actions">
  <action name="list_cut" type="plan" shortcut="true" />
  <action name="ppPaste" type="plan" shortcut="true" />
  <action name="pplist_delete" type="plan" />
  <action name="edit_multi_assignments" type="resourceAssignment"
  />
  <action name="edit_multiple_activities" type="planActivity" />
  <action name="outdent" type="plan" shortcut="true" />
  <action name="indent" type="plan" shortcut="true" />
  <action name="add_to_timeline" type="plan" />
  <action name="create_activity" type="planActivity" shortcut=
  "true" />
  <action name="explode" type="folder" />
  <action name="implode" type="folder" />
  <action name="import_msp_plan" type="plan" />
  <action name="edit_plan_in_msp" type="plan" />
  <action name="export_plan" type="plan" />
  <action name="view_gantt_Explorer" type="plan" />
  <action name="create_multiple_activities" type="plan" />
  <action name="start_plan" type="plan" />
  <action name="suspend_plan" type="plan" />
  <action name="resume_plan" type="plan" />
  <action name="complete_plan" type="plan" />
    <action name="exportTablePDF" type="object" />
    <action name="exportTableXLS" type="object" />
</model>
```

4. Save the file.
5. Restart the Method Server.

---

 **Note**

You can also add these additional actions:

- Export List to Text
  - Export List to CSV
  - Export List to XLSX
  - Export List to XML
-
