Screen shots of various Vaults and what I am needing to do.

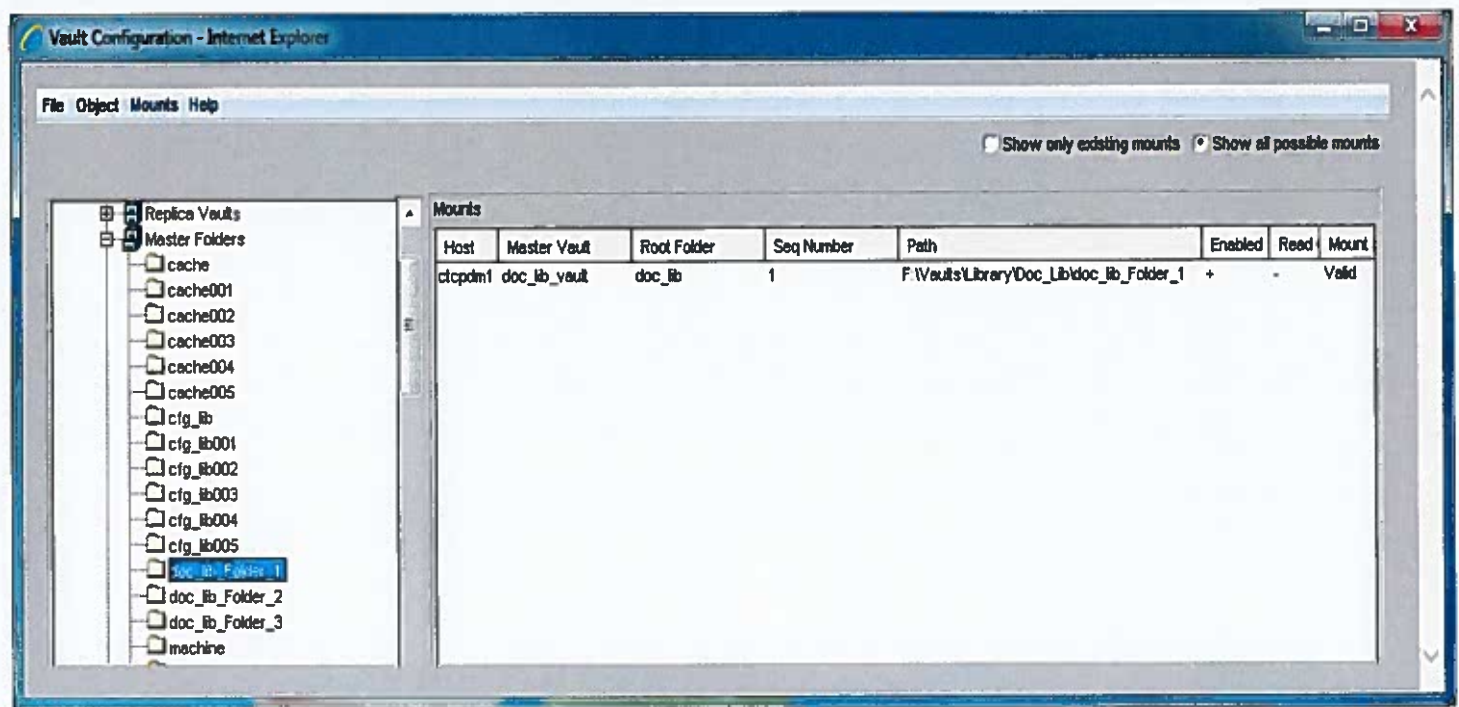

This is my production server defaultuploadvault which shows the path to the file location.

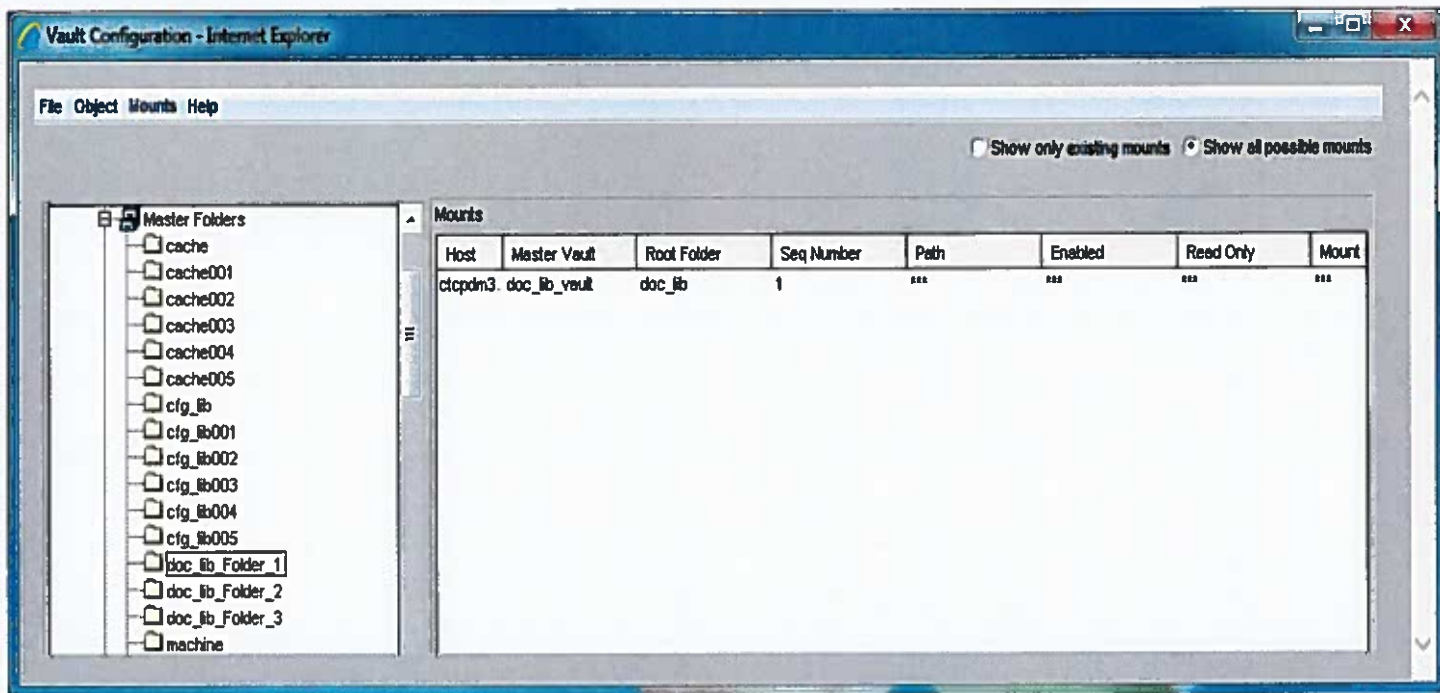

This is my development server and the path is blanked out. There is no Object-Mount option like with the other vaults to assign/mount the proper location.

File Object Mounts Help

☐ Show only existing mounts ⦿ Show all possible mounts

Replica Vaults
Master Folders
- cache
- cache001
- cache002
- cache003
- cache004
- cache005
- cfg_lib
- cfg_lib001
- cfg_lib002
- cfg_lib003
- cfg_lib004
- cfg_lib005
- doc_lib_Folder_1
- doc_lib_Folder_2
- doc_lib_Folder_3
- machine

Mounts

Host	Master Vault	Root Folder	Seq Number	Path	Enabled	Read	Mount
ctcpdm1	cache_vault	-	2	F:\Vaults\Cache\cache_001-025\cache001	+	-	Valid

This a normal folder definition for the production server.

Mounts

Host	Master Vault	Root Folder	Seq Number	Path	Enabled	Read	Mount
ctcpdm1	doc_lib_vault	doc_lib	1	F:\Vaults\Library\Doc_Lib\doc_lib_Folder_1	+	-	Valid

This is the Doc_Lib folder showing a mount path and a Root Folder. None of the other folders have a root path and I do not have the option for Object-Mount with these 3 folders.

Mounts

Host	Master Vault	Root Folder	Seq Number	Path	Enabled	Read Only	Mount
ctcpdm3	doc_lib_vault	doc_lib	1	***	***	***	***

On my rehosted development system, how do I set the Path for the folders which have a Root Folder but no Object-Mount option?
