# Windchill Administrative Permission & Tool Enhancement Requests

TC Member Survey - Summary Report
## 04/07/2016

Question #1

Would your business see value in being able to assign the individual permissions currently available only through bundled out-of-the-box roles (e.g., Product/Library Manager, Org Admin) to other business-defined roles as required?

Other category callout:
- Already doing this with group privileges
- No - this is probably dangerous beyond Admin (sounds like your Admin(s) need to be closer to Eng than IT)
- Yes, also to be able to manage user account and group membership w/o Org admin

| Response	Count
Yes	51
No	15
Not certain, would need better understanding	5
Other	3

Question #2

Would your business see value in being able to assign a permission that allows the Check In of CAD data from another user's server-side Workspace to a role?

No - Admin can log on as unavbailable User and complete

Yes	63
No	9
Not certain, would need better understanding	1
Other	1

Question #3

Would your business see value in being able to recover CAD file contents from the local Workspace cache?

Bar chart values:
- Yes: 57
- No: 6
- Not certain, would need better understanding: 5
- Other: 6

Other responses:
- External Toolset already provides this capability. Would apreciate UI Improvements on that tool.
- No - As above, log in on User machine as User to access (use case 2), and if cache is corrupt it's probably gone anyway
- There are workarounds today that allow for this functionality.
- There is a program from PTC called WC_Filerecovery...this is what we use to convert the LID names to the file name.
- we have that ability with a user provide tool
- We made a tool to do this, but it is very cumbersome, would rather have another user sit at that computer be able to access workspaces

Question #4

Would you be interested in attending a Technical Committee session to engage in further discussion of these topics and related Product Enhancement Ideas?

Callout listing "Other" responses:
- Company wide - Yes, me personally no - I am on the CAD side
- Depends on the "related Product Enhancement Ideas". Would like to see more examples that are not CAD related.
- Possibly, based on when it is scheduled
- Unable to attent face-face TC meeting
- Web session would be attended
- WIll not be able to attend this years session
- would like to but won't be able to attend this time
- Yes depending on schedule
- yes, but has to be online

Chart values:
- Yes: 49
- No: 16
- Other: 9
