Windchill 10.0 Software Matrices

Revision 1.1 Released 8 April 2011

Table of Contents

To view the table of contents pane of a PDF document, click the **Bookmarks** tab.

Introduction

This matrix represents the combinations of platforms, operating systems, and third party products that have been tested and verified by PTC. These recommended product combinations are based on compatibility, testing, performance, and reliability. Other software combinations not shown here may perform properly, but are not qualified through PTC's testing and validation process.

This matrix is a combined matrix for all 10.0 Windchill solutions with the following exceptions. The CAD Integrations information is contained in the Windchill CAD Integrations and Creo Elements/View Adapters Software Matrix. Some options are not available with the initial release of Windchill 10.0. For future support plans, please refer to the PTC product calendar at this URL: http://www.ptc.com/cs/doc/pds_calendar.pdf.

Definitions

Products identified as bundled are included with the Windchill solution that you have purchased. Products that are not bundled are either a separately priced optional add-on or products that you would acquire from a company other than PTC.

Post-FCS Testing and Support Plans

Some products will be verified after the initial release (FCS) of Windchill 10.0 solutions. These products may be listed in the matrix in gray italics to provide you with information that can be used for planning purposes. Actual version numbers and target maintenance releases may change prior to PTC supporting the combination. Planned future platform support can be found on the Windchill Future Support Summary matrix at this URL: http://www.ptc.com/view?im_dbkey=69784.

For information on when Windchill 10.0 maintenance releases will be available, see the PTC product calendar at this URL: http://www.ptc.com/cs/doc/pds calendar.pdf

Windchill CAD Integrations and Visualization

For information on Pro/ENGINEER, download the **Pro/ENGINEER Compatibility Matrix** at this URL: http://www.ptc.com/view?im_dbkey=58030

For information on CAD Integrations download the **Windchill CAD Integrations Matrix** at this URL: http://www.ptc.com/view?im_dbkey=121121

For information on Creo Elements/View Client and Adapter product platform support (both MCAD & ECAD) and their compatibility with Windchill, please refer to the URL's in the following table:

Clients:	Creo Elements/View Clients and Toolkit Software Matrix at this URL:
	http://www.ptc.com/view?im_dbkey=124983
A domtous.	Creo Elements/View Adapters Software Matrix at this URL:
Adapters:	http://www.ptc.com/view?im_dbkey=124988

Pro/INTRALINK 3.x Data Migration

In Release 10.0, PTC is providing capabilities for customers to migrate from Pro/INTRALINK 3.4 into either Pro/INTRALINK 10.0 or Windchill PDMLink 10.0.

For information on the Pro/INTRALINK Data Migrator, see the **Pro/INTRALINK Data Migrator Compatibility Matrix** at this URL: http://www.ptc.com/view?im_dbkey=58010.

Pro/INTRALINK 10.0

For Pro/INTRALINK 10.0, PTC offers a bundled Oracle database that can be installed using its PTC Solution Installer. See the Database section below for the platforms supported.

Arbortext Integration

Arbortext integration is not supported with Pro/INTRALINK 10.0.

For information on Arbortext, please refer to the Arbortext Software Compatibility Matrices at this URL: http://www.ptc.com/view?im_dbkey=83390.

Development Systems Support

The following are the OS platforms supported for Windchill Development. Note that not all development systems are supported as server platforms in an enterprise deployment. PTC strongly recommends that customers use the same platform for their test and production environments.

- Windows 2003 Server, 32- and 64-bit (except Itanium)
- Windows 2008 Server, 64-bit
- Windows 2008 R2 Server, 64-bit
- Windows XP 32-bit
- Windows Vista 32-bit
- Windows 7
- Solaris 10 (SPARC & x64)
- HPUX 11i V3 (Itanium)
- Red Hat Enterprise Linux 5 (64-bit)
- AIX 6.1

Internet Protocols

Windchill supports both IPv4 and IPv6, though there are caveats to the IPv6 support. Some 3rd party applications do not yet support IPv6. Therefore, IPv6 support is currently limited to the communication between the Windchill client and the Windchill Server. Sites implementing IPv6 must have a dual-stack Windchill Server (IPv4/IPv6). Please see the Windchill Advanced Installation and Configuration Guide for more information.

Virtual Systems

Windchill running on virtual systems is supported. Specifically tested are VMWare images of Windows, RedHat Enterprise Linux and Solaris X64; Zones image of Solaris 10; and LPAR image of AIX 6.1.

Upgrade Support

Customers upgrading to Windchill 10.0 from Windchill 8.0 must continue to use Aphelion during the upgrade process. Once the upgrade is complete, then the upgrade to Windchill Directory Server must be done.

Java Server Side Support

This table describes the Java versions which are supported for use with the Windchill server. Java is a required component for the Windchill server.

Windchill 10.0	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Java Software Developer Kit (SDK) (1) (2) – server side only	Yes		1.6.0_22 from Oracle/Sun Microsystems	1.6.0_22 from Oracle/Sun Microsystems	1.6.0_22 from Oracle/Sun Microsystems	1.6.0_22 from Oracle/Sun Microsystems	6.0.08 from HP	V6 SR 8 from IBM	1.6.0_22 from Oracle/Sun Microsystems

- 1) SDK versions shown are the SDK versions that were tested. Higher versions in the 1.6.0_xx series are also expected to work.
- 2) 64-bit capable platforms can run Windchill on a 64-bit JVM. The 64-bit JVM is required on Windows Servers and used by default on the other platforms.

Web Servers and Servlet Engines

This table describes the Web server and servlet engine combinations that are supported for 10.0 Windchill solutions. All Web server and servlet engines are supported with both the HTTPS and HTTP protocols. A web server/servlet engine combination, or a web server/application server combination, is a required component.

Windchill 10.0	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Web Server/ Servlet Engine Software			Server	Server	Server	Server	Server	Server	Server
Apache Web Server with embedded Tomcat Servlet engine	Yes		Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.8 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29	Apache 2.2.17 or higher within the Apache 2.2.x series with Tomcat 6.0.29 (5)
Sun Java System Web Server(1)	No		N/A	N/A	N/A	Sun Java System Web Server 7.0 Update 8 (3)	N/A	N/A	N/A
Microsoft Internet Information Server (IIS) with embedded Tomcat Servlet Engine (2)	No		IIS 6.0 with Tomcat 6.0.29 (3)	IIS 7.0 with Tomcat 6.0.29 (3)	IIS 7.5 with Tomcat 6.0.29 (3)	N/A	N/A	N/A	N/A
HTTPServer	No		N/A	N/A		N/A	N/A	HTTPServer 7.0(3)(4)	N/A

Notes:

1) PTC Windchill bundles Windchill Directory Server that will meet Sun Java Enterprise System's LDAP requirement.

- 2) Microsoft's Internet Information Server (IIS) does not have a direct link to standard LDAP servers. If you want to use a directory service with IIS, you should use Microsoft's Active Directory.
- 3) Remote File Server is only supported with Apache/Tomcat.
- 4) 32-bit version required if using Cognos 8.4.1.
- 5) Openssl 0.9.8.o and compat-openIdap packages must be installed on this platform.

Database

This table describes the database versions and editions that are supported for 10.0 Windchill solutions. The database is a required component.

Oracle 11g:

Database	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)(3)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Linux (4)
Oracle11gR2 Enterprise Edition (1)	Bundled only with Pro/INTRALINK 10.0		11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series
Oracle11gR2 Standard Edition (1)(2)	No		11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series
Oracle11gR2 Client	No		11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series	11.2.0.1 or higher patchsets in the 11.2.0.x series

Oracle11gR2 Thin								
Drivers	Yes	11.2.0.1.0	11.2.0.1.0	11.2.0.1.0	11.2.0.1.0	11.2.0.1.0	11.2.0.1.0	11.2.0.1.0

SQL Server:

Database	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)(3) (7)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Linux
SQL Server 2008 R2 Enterprise Edition (5) (6)	No		2008 R2	2008 R2	2008 R2	N/A	N/A	N/A	N/A
SQL Server 2008 R2 Standard Edition (5) (6)	No		2008 R2	2008 R2	2008 R2	N/A	N/A	N/A	N/A
Microsoft JDBC Drivers	Yes		2.0	2.0	2.0	2.0	2.0	2.0	2.0

- 1) Both 32 bit and 64 bit versions of Oracle are supported.
- 2) Oracle Standard Edition One is also supported. Please see Oracle documentation for CPU and user limits with this edition.
- 3) Windows running on Itanium or Opteron is also supported for the Database tier. The SCU is not supported on these platforms. See Oracle or SQL Server documentation for specifics.
- 4) See Oracle's web site (<u>www.oracle.com</u>) for versions of Linux supported.
- 5) Later service packs to SQL Server 2008 R2 are also supported.
- 6) Note that there are different case sensitivity collation needs between Windchill and Cognos. If using the SQL Server Configuration Utility (SCU) to create a SQL Server database, it will be set correctly. If configuring manually, please refer to the Windchill Business Reporting installation and Configuration Guide.
- 7) SQL Server 2008 R2 is supported on Windows 2003 Server SP2 and higher.

Directory Servers

This table describes the LDAP directory servers that are supported for 10.0 Windchill solutions. Windchill Directory Server is a required component. Other LDAPs are optional.

Directory Servers	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC only)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Windchill Directory Server (Powered by OpenDS 2.3) (2)	Yes		Yes	Yes	Yes	Yes	N/A	Yes	Yes
Active Directory (1)(3)	No		Active Directory 2003	Active Directory 2008	Active Directory 2008	N/A	N/A	N/A	N/A
Any LDAP v3 compliant corporate directory service (1)	No		Yes	Yes	Yes	Yes	Yes	Yes	Yes

- 1) Customer option, but not required. Windchill Directory Server is required for every Windchill installation.
- 2) IIS does not authenticate against Windchill Directory Server. Authentication against Windchill Directory Server has been tested with Sun's Java Enterprise System (JES) Web Server and Apache.
- 3) Active Directory supported as read-only directory.

Bundled Server Components

This table describes the server-side components that are bundled with all Windchill solutions, and provide core infrastructure services. Info*Engine and the Info*Engine Adapter for Windchill are required components.

Bundled Server Components	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Info*Engine	Yes		Yes	Yes	Yes	Yes	Yes	Yes	Yes
Info*Engine Adapter for Windchill	Yes		Yes	Yes	Yes	Yes	Yes	Yes	Yes
LucidWorks SOLR 1.4.1	Yes		Yes	Yes	Yes	Yes	Yes	Yes	Yes
Cognos 8.4.1 (1) (2) (3)	Yes		Yes	Yes	Yes	Yes (SPARC only)	Yes	Yes	Yes (4)
Rosette Language Identifier 7.2.1	Yes		Yes	Yes	Yes	Yes	Yes	Yes	Yes
Rosette RLP Analysers 7.2.1	Yes		Yes	Yes	Yes	Yes	Yes	Yes	Yes

- 1) Cognos does not support Korean except with the Metrics Manager UI, which PTC does not bundle. Traditional Chinese is only supported with the Consumer Viewer (report output only). The Cognos Framework Manager (not bundled) is available in English only.
- 2) Windchill Business Reporting is not supported with Pro/INTRALINK.
- 3) Customers can use 32-bit Cognos products on 64-bit operating system kernels provided they are configured to run using 32-bit runtime libraries. For more information, refer to Cognos support site here.
- 4) Refer to the Cognos support site for OS patches required for Cognos installation.

Enterprise Systems Integration

This table describes the components of Windchill Enterprise Systems Integration (Windchill ESI). Windchill ESI is an optional product.

Windchill ESI Components	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 (Itanium)	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
TIBCO Enterprise Message Service 5.1.4	No		Yes	Yes	N/A	Yes	Yes	N/A	Yes
TIBCO BusinessWorks 5.7.2	No		Yes	Yes	N/A	Yes	Yes	N/A	Yes
TIBCO Administrator Enterprise Edition 5.6.1	No		Yes	Yes	N/A	Yes	Yes	N/A	Yes
TIBCO TRA Suite 5.6.2 - Hawk Version 4.8.1	No		Yes	Yes	N/A	Yes	Yes	N/A	Yes
TIBCO SAP Adapter 6.0.0	No		Yes (1)	N/A	N/A	Yes (1)	Yes (1)	N/A	Yes (1)
ESI Business Logic for SAP	No	mySAP 2004 with ECC 5.0, mySAP 2005 with ECC 6.0	Yes	Yes	N/A	Yes	Yes	N.A	Yes
TIBCO Adapter for Oracle Applications 5.4.0	No		Yes	N/A	N/A	Yes (SPARC Only)	Yes	N/A	Yes
ESI Business Logic for Oracle Applications	No	Oracle Applications 11.5.10, 12.0.6, 12.1.1	Yes	Yes	N/A	Yes	Yes	N/A	Yes

Notes:

1) Windows and RHEL platforms require 32-bit SAP JCO 2.1.6 or higher. All other supported platforms require 64-bit SAP JCO 2.1.6 or higher.

Optional Windchill Components

This table contains support information for several optional components.

Optional Components	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 Itanium	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Windchill PartsLink	No	Windchill PDMLink	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Windchill MPMLink	No	Windchill PDMLink	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Information Modeler	No	None	Yes	Yes	Yes	Yes	N/A	N/A	Yes
Counterpart	Yes For PDM only	None	Yes	N/A	N/A	N/A	N/A	N/A	N/A
Windchill Web Parts for SharePoint	No	NET Framework 3.5 Windows SharePoint Services 3.0, Microsoft Office SharePoint Server 2007, or Windchill ProductPoint 1.0+	Yes	Yes		N/A	N/A	N/A	N/A
Windchill RequirementsLink (2)		Windchill PDMLink	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Windchill Gateway for Cadence® Allegro® Design Workbench (ADW) (1)	No	Windchill PDMLink Cadence® Allegro® Design Workbench 16.3 and 16.4	Yes	Yes	Yes	Yes	Yes	Yes	Yes

Notes:

- 1) The Winchill Gateway for Cadence® Allegro® Design Workbench (ADW) client adapter (ADW Server) is certified for Windows XP only
- 2) RequirementsLink Microsoft Word support is limited to Word 2003.

Windchill Archive

Windchill Archive is an optional module.

Optional Components	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 9 (SPARC only)	Solaris 10 (SPARC only)	HP-UX 11i V3 Itanium	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
Windchill Archive Server (1)	No	EMC Centera: (Content Addressed Storage), EMC Centera API 2.3	N/A (3)	N/A	N/A	Yes	N/A	N/A	N/A	N/A
Windchill Archive Client	No		Yes	Yes (2)	Yes (2)	N/A	Yes	Yes	Yes	Yes (2)

- 1) The appropriate JRE is bundled with the installer.
- 2) Manual installation steps are required for Windows 2008 Server (64-bit), Windows 2008 R2 Server (64-bit), and Red Hat Linux 5(64-bit).
- 3) Windchill Archive Server is supported and can be installed on Windows 2003 Server (32-bit) standalone platform, and this Archive server can be used to install/configure the Windchill Archive client on the listed supported platforms.

Windchill Integrations for Embedded Software

Windchill Integration for Embedded Software is an optional module.

Optional Components	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 Itanium	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
IBM Rational	No	Windchill	2003.06.10 or	2003.06.10 or	2003.06.10 or	2003.06.10 or	2003.06.10 or	2003.06.10 or	2003.06.10 or
ClearCase (1)		PDMLink	later versions of	later versions	later versions of	later versions of	later versions	later versions	later versions
			ClearCase 6.0,	of ClearCase	ClearCase 6.0,	ClearCase 6.0,	of ClearCase	of ClearCase	of ClearCase

		PDMLink							

- 1) The ClearCase adapter (client) platforms/OS certified are Windows XP Pro and Windows 2003 Server.
- 2) The adapter is certified with a Subversion server operating on either Unix or Windows OS.
- 3) The adapter is certified with a JIRA server operating on a Windows OS.
- 4) The adapter is certified with a Bugzilla server on either Unix or Windows OS.
- 5) The plug-in is certified with Eclipse clients on Windows OS.

Client Platform Support (1)

This table describes the client infrastructure supported by 10.0 Windchill solutions. A web browser and java plug-in are required components. The JRE is required only for use with a workgroup manager (See Windchill CAD Integrations section of this document).

Client Software	Bundled	Windows XP Professional (SP2 or higher)	Windows XP X64 (Opteron and EM64T)	Windows XP Home (SP2 or higher)	Windows Vista (32- & 64-bit) (5)	Windows 7 (32- & 64-bit)	Solaris 10 (SPARC & x64)
Microsoft							
Internet Explorer	No	7.0 (4); 8.0	7.0 (4); 8.0	7.0 (4); 8.0	7.0 (5); 8.0	8.0 (6)	N/A

			series (3)			series	series

- 1) Webex Meeting Center is an optional client component that can be used with the Windchill 10.0 product line. See the Meeting Center system requirements at the following URL for more details on browser and platform support, and minimum hardware specifications: http://support.webex.com/support/system-requirements.html.
- 2) Higher versions of the 1.6.0_xx plug-in are supported.
- 3) 32-bit plug-in is used on Windows XP 64-bit.
- 4) Internet Explorer 7.0.5730.11 or higher is recommended if using Internet Explorer 7.0. Internet Explorer 8.0 is recommended over Internet Explorer 7.0, as there have been performance improvements in Internet Explorer 8.0.
- 5) There are known issues using Internet Explorer on Vista. Please refer to TAN 138195.
- 6) When using Internet Explorer 8.0, make sure the Browser Mode and Document Mode are set to 'Internet Explorer 8' and 'Internet Explorer 8 Standards' respectively. Other settings are not supported or tested and may have adverse effects.

Windchill Client Components

This table describes Windchill client software. These components are optional.

Client Software	Bundled	Dependent Product	Windows XP Professional (SP2 or higher)	Windows XP Professio nal X64 (Opteron and EM64T)	Windows XP Home (SP2 or higher)	Window s Vista 32-bit	Window s Vista 64-bit	Windows 7 32-bit	Windows 7 64-bit	Solaris 10 x64
PTC Desktop and Office Integration (2) (3)	Yes	Office 2003, Office 2007, Outlook 2007	Yes	Yes	Yes	Yes	Yes	Yes	Yes	N/A
Windchill ProjectLink Plug in for Microsoft Project (1)	Yes	Microsoft Project 2003, Microsoft Project 2007	Yes	N/A	N/A	Yes (4)	N/A	Yes	N/A	N/A

- 1) Available with Windchill ProjectLink only.
- 2) Microsoft Office integration support is limited to Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Microsoft Outlook, and Microsoft Windows Explorer.
- 3) PTC Desktop and Office Integration is not supported with Pro/INTRALINK 10.0.
- 4) Windchill ProjectLink Plug in for Microsoft Project supported on 32-bit only.

Info*Engine Adapters

The following products will work with the Windchill solutions or Info*Engine standalone.

Info*Engine Adapters	Bundled	Dependent Product	Windows 2003 Server (64- bit)(SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 Itanium	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)
DOORS	No	Doors 9.1, 9.2	Yes	Yes	Yes	Yes	Yes	Yes	Yes
JDBC	No	Any JDBC 3.0 or JDBC 4.0 compliant database	Yes	Yes	Yes	Yes	Yes	Yes	Yes
JNDI	Yes	Any JNDI V3 compliant directory service	Yes	Yes	Yes	Yes	Yes	Yes	Yes
JADK	No		Yes	Yes	Yes	Yes	Yes	Yes	Yes
SAP	No	mySAP 2004 with ECC 5.0, mySAP 2005 with ECC 6.0	Yes	N/A	N/A	Yes	Yes	N/A	Yes

Notes:

1. SAP Adapter continues to require JCO 2.1.x. It has been tested on JCO 2.1.9.

Integration Products Interoperability

The following integration products are interoperable with Info*Engine.

Product	Bundled	Tested Transports or Protocols (1)
IBM WebSphere Process Server 6.0.2	No	Web Services
IBM WebSphere MQ 5.3/6	No	Java Message Service 1.1
TIBCO Business Works 5.7.2	Yes (2)	Web Services
TIBCO Enterprise Message Service 5.1.4	Yes (2)	Java Message Service 1.1

- 1) Other product versions, transports, and protocols may work, but have not been tested by PTC. PTC cannot provide specific support for untested versions, transports, or protocols.
- 2) This software is only bundled with Windchill Enterprise Systems Integration.

Development Software

Development Software	Bundled	Dependent Product	Windows 2003 Server (64-bit) (SP1 or higher)	Windows 2008 Server (64-bit)	Windows 2008 R2 Server (64-bit)	Solaris 10 (SPARC & x64)	HP-UX 11i V3 Itanium	AIX 6.1 (SP1 or higher)	Red Hat Enterprise Linux 5.x (64-bit ES or AS)

Xerces	Yes		2.10.0	2.10.0	2.10.0	2.10.0	2.10.0	2.10.0	2.10.0

Notes:

- 1) Testing was done with the 32 bit SDK version indicated, except for Windows 2003 and Windows 2008 64-bit
- 2) Express Data Manager from EPM Technology is needed in order to run STEP. STEP on 64-bit platforms may be supported in an X-20 MOR depending on the availability of EDM support for 64-bit OSs.
- 3) Only those classes required for visualization are included.
- 4) SDK versions shown are the SDK versions that were tested. Higher versions in the 1.6.0_xx series are also expected to work.
- 5) Cognos provides their own version of Apache Axis, version 1.1, which is used in the Cognos integration.
- 6) Version specified in the matrix is only used with Workflow task forms.
- 7) Not used by default. Provided for customer convenience.
- 8) Perl is shipped with the OS, so the version may vary. Testing was done with the version provided with the OS.
- 9) Only the needed libraries from GWT Incubator are included.
- 10) Used by MPMLink and ProjectLink

Revision History

Date Modified	Revision	Description of Change
17 December 2010	0.0	Preproduction matrix posted.

3 February 2011	0.1	Added link to the Windchill Future Platform Support Matrix.
18 March 2011	1.0	Release of Windchill 10.0 Software Matrices
8 April 2011	1.1	In the Database section, clarified supported patchset statement
