

**Windchill 10.1 M040**  
**CAD Integrations Matrix**  
**Application Versions and Platform Supported with Windchill Solutions**

#### Introduction

This matrix represents the combinations of CAD systems, platforms, and operating systems, tested and verified by PTC in terms of interoperability with Windchill. These recommended product combinations are based on compatibility, testing, performance, and reliability. Other software combinations not shown here may perform properly, but are not qualified through PTC's testing and validation process, and so cannot be considered supported by PTC.

All information herein is subject to change without notice.

#### Key

- Windchill Workgroup Manager Support (WWGM)
- After release of application
- Future support
- Support Dropped
- Client-side viewable unsupported

## Backward Compatibility of Workgroup Manager Maintenance Releases with Previous Windchill Server Maintenance Releases

Backward compatibility of the Windchill Workgroup Manager provides the ability to leverage the latest maintenance release of the Workgroup Manager client (new CAD version support, client bug fixes, and client side new features) without having to upgrade the Windchill server (although the new WWGM client will need to be installed into the server, there will be no updates to the server in terms of bug fixes or functionality). Note that new features and SPR fixes introduced in later client MORs **that require server side support will NOT be supported** with backward compatibility.

Backward compatibility of the Workgroup Manager is supported for the following CAD tools **ONLY** from 10.1 M020 onwards:

AutoCAD  
Autodesk Inventor  
SolidWorks  
NX  
CATIA V5

The following table describes the level of backward compatibility for each MOR:

Windchill Server MOR	WWGM MOR
