

FOOBOT

INDOOR AIR QUALITY MONITOR

INCREASE HEALTH

- Home and office environments benefit from Foobot as the reduction of volatile organic compounds is constantly monitored. Foobot meets this by alerting users when the WHO maximum levels (300ppb) are present.
- Ideal for daycare and schools.
- Older buildings are major sources of man-made VOC's from paints and coatings, glues in furniture etc.

GENERAL

- Smart Monitoring-indicates air quality in real time
- Big Data-indicates pollution spikes in urban ecosystems. Over 45 countries supported.
- Companion App-combines metrics into one comprehensive score
- Plays well with many other automated devices
- Sensors measure particulates and harmful gases
