

AMBI CLIMATE™

Automate any standalone ac unit that can be operated with an infrared remote control.

Whether you have a window, wall mounted or portable AC, AMBI CLIMATE™ can work with it

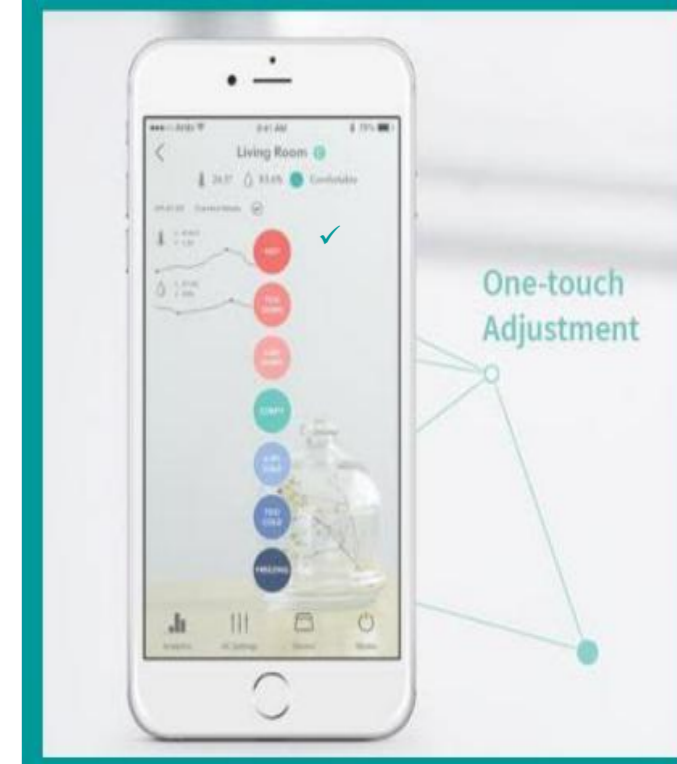

- Presence sensor
- Weather data
- Predictive AI algorithm

AMBI Climate™ AI considers:

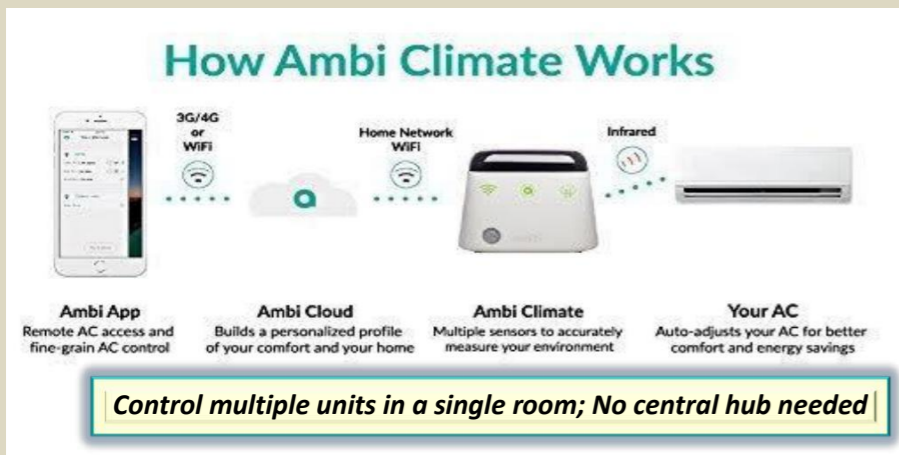

- ✓ Seasonality
- ✓ Time of the day
- ✓ Thermal radiation
- ✓ Outdoor weather changes
- ✓ Indoor temperature
- ✓ Indoor humidity
- ✓ Ambient light level

Simply interact with the in-app feedback interface to indicate your comfort level: Ambi's AI will learn from you to continually auto adjust your AC and cater for your needs

*7 infrared transmitters for ac connection

*Broadband internet connection with Wi-Fi network, 2.4 GHz for setup

All you need is the app, WIFI, a power outlet and 5 minutes to setup

MODES

- *Comfort Mode*
- *Temperature Mode*
- *Away Mode*
- *Manual Mode*

Voice Control & Integration

Communicate with Alexa or Google home to provide comfort feedback and control your AC or Use IFTTT and an open API for ultimate Smart Home experience

All New Design
New, minimal design seamlessly blends into your lifestyle.

Money Saving
Save up on Energy Costs and cut up to 30% off your electricity bill each month!

A.I. Powered
