

WATER AND ELECTRIC METER IN HOUSE

Benefits of internet of things to the consumers and suppliers:

1. Can be monitored remotely without needing to go home by home for monitoring
2. Can send the bills using emails which can reduce the need of paper
3. Can control the amount of water supplied and the supply in case of maintenance or reconstruction.
4. Can monitor the amount of the consumption daily, monthly, annually
5. Can operate the meter remotely so that all operations can be done in a shorter time
6. By automation, any careless consumer can be warned and cut off the electrical and water supply automatically if the consumer did not pay the overdues.
