Smart Components

Mint test analyzes breath through a highly sophisticated array of sensors, Mint can detect the signs that harmful bacteria leave behind and accurately report through the Mint app. Reports also on breath quality and hydration.

The mint breathometer utilizes an electrochemical printed fuel-cell sensor technology to run its tests.

Identify Parts

Medical grade plastics shell

Micro-USB charging port connected to rechargeable lithium battery

Intake fan (draws in air from mouth to run tests)

Circuit Board

# Connectivity Components

Connects to iPhones with iOS 9.1 or newer and Android 4.4.4 or newer via bluetooth LE

Bluetooth antenna
