

# *SONOS PLAY:5*

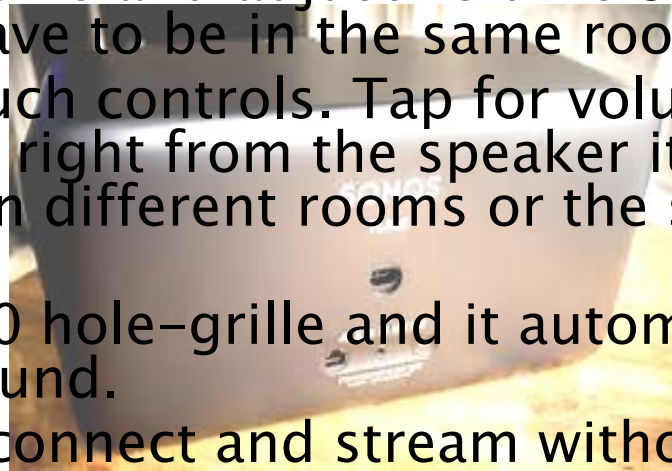

# Components

- ▶ It has got 6 drivers, including 3 mid-woofers and 3 tweeters.
- ▶ Its physical components consist of the speaker itself and its electric components.
- ▶ Now coming to smart components, it consists of convenient, ultra responsive top panel touch controls, sensors, micro-processors, analytics, remote control, etc.
- ▶ Connectivity components include wifi and hard wire (line-in feature).

# Capabilities

- ▶ We can control this speaker remotely with the help of dedicated 'SONOS App' which helps us quickly search through all our services to track down favorite music, send it to different rooms and adjust volume & other settings. We don't even have to be in the same room.
- ▶ It comes with touch controls. Tap for volume and swipe to change the track right from the speaker itself. Play different songs in different rooms or the same song everywhere.
- ▶ It has over 60000 hole-grille and it automatically optimizes the sound.
- ▶ It runs on Wi-Fi connect and stream without interruptions or interference that can come using bluetooth.
- ▶ It keeps getting better, software updates come from time to time which improve it day by day.

# Insights

- ▶ It is bold, pure, dynamic intense with deep bass that packs a punch.
- ▶ Uncompromised sound whether vertical or horizontal.
- ▶ Convenient, ultra-responsive top panel touch controls.
- ▶ It uses Trueplay tuning to make sure we get the very best sound out of our PLAy:5
- ▶ It is built humidity resistant so we can enjoy our favorite songs in music starved places also, but remember it is not waterproof..
- ▶ It comes in two colors– white and black with matte finish and graphite grille.
- ▶ It is very convenient for customers as well as manufacturing company as it can remotely update it and render services wherever necessary.
