Article - CS120201

When trying to regenerate a specific model, an information window appears with the statement "**!***ERR: in (model name) cannot evaluate expression (expression)**" in Creo Parametric

Modified: 06-Aug-2021

Applies To

- Pro/ENGINEER and Creo Elements/Pro Wildfire to Wildfire 5.0
- Creo Parametric 1.0 to 4.0

Description

- When trying to regenerate a specific model, an information window appears with the statement :

*!***ERR: in (model name) cannot evaluate expression (expression)*

- Pro/PROGRAM error message appears when trying to regenerate model :

Aborting regeneration due to failures executing Pro/Program

Cause

- This is caused by an incorrect statement made in Pro/PROGRAM

Resolution

1. Open the model that is causing this issue

Note : If the affected model is an assembly, the problem might be in one of its components. Open the components individually and try regenerating them to see if the same error occurs.

2. Go to **Tools > Program > Edit Design**
3. Find the expression mentioned in the error message

4. Delete the expression
5. Click **File** > **Save** then **File** > **Exit**
6. Choose **Yes** to incorporate the change into the model
7. **Done/Return**
